

Management Analyst Update

NCMA Minute

As part of the outreach requirements for the Commission's Management Analyst and in effort to collect and disseminate information on essential services and programs as required per the Commission's NRS, the Management Analyst will work collaboratively mainly with state agencies and Minority Serving Organizations to do a one-minute video clip where a representative from the organization will describe the services or programs the organization offers. The video clips will be explicitly related to the areas of focus of the Commission's subcommittees.

Example: If the video clip is regarding the services offered by the Alzheimer's Association, that will be the NCMA Health minute.

The video clips will be posted on the Commission's Facebook account and saved on different albums labeled by subcommittees for easy and quick access by constituents.
